

Enough is Enough PDX

Our public spaces including parks, nature areas, residential streets and business districts are littered with trash, biohazards & camping. **Have you had enough?**

Enough is Enough PDX is a City-Wide campaign led by neighborhoods to demand our elected officials at the state, city, and county level respond to the property crime wave and deteriorating livability issues in neighborhoods across Portland.

In a majority of these camps, service resistant individuals live and use heroin and methamphetamine, supporting those habits by stealing daily from the neighborhoods they are located.

While neighbors across the city make thousands of reports, response from the city and state is slow, inadequate and often non-existent.
